

1. Start "Skanlite"

Press [Alt] + [F2], type "skanlite" in the Command Promt and press [Enter]

2. Scan Document or Image

Select preferred Colormode (dt.: "*Scanmodus*") and Resolution (dt.: "*Scanauflösung*") **! Notice:** The default Setting of 600 DPI produces large files and the Scanning-process will last for some time !

Click the Scannen Button
